Couples continue to spend more on weddings despite deflation in Japan

- Primary causes
1. Couples want a once-in-a-lifetime event that people will remember for a long time
 2. As the age of first marriages rises, more couples want better food and entertainment for guests and activities that incorporate each couple's personal preferences
 3. More young people who do not care about luxury in their everyday lives want to spend money to make a wedding a memorable experience

Consistent growth in the amount spent per wedding guest
(now about 70% higher than in 2000)
